Profile

Computer Science Enthusiast: A motivated third-year B.Tech student with a strong foundation in programming and problem-solving. Proficient in C++ and always exploring new technologies.

Hackathon Experience: Actively participating in hackathons, with a runner-up finish, where I honed my ability to think on my feet, collaborate effectively, and communicate ideas clearly.

Growth-Oriented: Always seeking opportunities to learn, grow, and apply my skills to real-world projects that push me beyond my comfort zone.

Education

Pursuing B.Tech in Computer Science and Engineering <i>Prestige Institute of Engineering Management and Research</i>	2023 - 2027 Indore, Madhya Pradesh
Indian Certificate of Secondary Education (ICSE) <i>Little Wonders Convent School</i>	2008 - 2023 Indore, Madhya Pradesh

Skills

Programming Languages: C/C++, Python

Developer Tools: Git and GitHub, Windows, VS Code

Soft Skills: Communication, Adaptability, Teamwork, Multitasking

Strengths: Fast Learner, Problem Solver, Dedicated Team Player

Coursework: Data Structures, Object Oriented Programming

Hackathon Experience

Hackathon Participant

Various Hackathons

India

- Worked with teams to solve real-world problems in university and national-level hackathons under tight deadlines.
- Presented technical ideas clearly to judges and mentors, explaining solutions in a simple and effective way.
- Achieved Second Runner-up position in a competitive hackathon, standing out among multiple teams.
- Interacted with industry experts and students, improving team collaboration and time management skills.

Projects

College Management System Website | *A dynamic platform to manage academic and administrative tasks.*

- Collaborated with a team to build a user-friendly college management website. (**HTML, CSS**).
- Implemented features such as student/teacher login, signup forms, marks display and feedback section **advanced user authentication**, and **advanced search functionality**. .
- Designed a responsive and user-friendly interface, enhancing user experience and engagement by 30%
- Contributed to system design by preparing flowcharts and ER diagrams.

Proximity Chat App | *A real-time location-based chat application for nearby user interactions.*

- Developed the frontend of the website using **HTML, CSS, and JavaScript**, with basic knowledge of **React**.
- Utilized Geolocation APIs to track and display nearby users within a specified distance range.
- Implemented WebSocket communication for instant real-time messaging between nearby users.
- Contributed to system design by preparing flowcharts, ER diagrams, and presentations.

Certifications & Achievements

- Secured **Second Runner-up** in a website development competition at **Urjotsav 2024 – PIEMR**, recognized for creativity, design, and technical execution.
- Completed **Object-Oriented Programming Onramp – MathWorks** in January 2025, gaining foundational knowledge of object-oriented programming (OOP) concepts.
- Earned a certificate in **Introduction to GitHub – Microsoft** in January 2025, with hands-on experience in version control using Git and collaboration through GitHub repositories.
